

LUCCON VENEER - the material

Translucent concrete veneer with or without high quartz rate fiber optics;

Characteristics:

Three dimensional pliability through coating with carrier film;

Size of elements:

Up to 100 cm x 50 cm; individual measurements according to requirements

Element strength:

Standard 0.8 mm

UV resistance:

Very high;

Processing:

Cutting, gluing, drilling etc.

Application:

Automotive and yacht engineering, room set up and decor etc. – a novel material innovation whose limits are only set by your own imagination and creativity!
